

Students – Submitting Scores

After you have taken a quiz, you will need to click the Check button to have the quiz scored.

Click **Show Saved Scores** when you want to **Submit** the results to your teacher. You don't have to each time. When you Submit, it will update all of the scores which haven't been submitted yet.

Activity	Correct	Possible	%Score	Date/Time
perapera01 5-Act2	4	5	80.00%	2016-8-31T12:51:38

*Results followed by an * have already been submitted.

[Submit saved data](#)

Use this option to submit data to your instructor.

[Delete saved data](#)

Use this option to delete all results for this product from this device.

[Reset data flags](#)

Use this option to reset the data flags, so all results will be submitted the next time you submit. This can result in duplicate results, so you should only reset the data flags if you need to submit.

Click **Submit saved data**

Submit Data

Send data to:

My name:

My e-mail address:

My course/section:

The first time through, you will see a box like this, and you need to add your own information.

Submit Data

Send data to:

My name:

My e-mail address:

My course/section:

Send data to is the important one, as it directs your results to your instructor. Check with your teacher to ensure you have the right address.

Add your information to the rest of the box, and then **Update my user information**. Once updated, you will not have to do this again (when accessing with this browser).

When you are ready, **Submit saved data**, to send that to your instructor. There should be a **“successfully posted”** message, and then you can close that tab (on the browser).
